EDUCATION

Manav Rachna University <i>Bachelor of Technology in Computer Science and Engineering CGPA: 8.84</i>	Faridabad, Haryana, India <i>August 2023 – August 2027</i>
Vidya Mandir Public School <i>Senior Secondary (Class 12), CBSE Percentage: 83.6%</i>	Faridabad, Haryana, India <i>March 2022 – May 2023</i>
Vidya Mandir Public School <i>Secondary (Class 10), CBSE Percentage: 91.4%</i>	Faridabad, Haryana, India <i>March 2020 – May 2021</i>

EXPERIENCE

Python Development Intern Certificate <i>TechnoHacks Solutions Private Limited</i>	June 2025 – July 2025 <i>Remote</i>
- Developed a Python web scraper to automate large-scale data extraction, reducing manual effort by 95%, improving accuracy and speed. - Built a Flask-based Weather App integrating OpenWeatherMap API to deliver real-time weather insights. - Optimized backend with secure API handling and Git version control, enhancing reliability and scalability.	

PROJECTS

Employee Leave Management System <i>Python, Flask, MySQL</i> Github	June 2026 – July 2026
- Developed a role-based full-stack web application for employee leave management, enabling leave applications, status tracking, cancellation, and profile management. - Implemented secure authentication, password hashing, role-based authorization, parameterized SQL queries, and an admin dashboard for filtering, approving, and rejecting leave requests.	
MentalGlow-AI <i>Python, React.js, FastAPI, Scikit-learn</i> Github Link	August 2025 – October 2025
- Developed an AI-driven platform for mental health prediction using ML classification models; achieved 92% model accuracy across multi-class emotion datasets. - Integrated interactive frontend with FastAPI backend, enabling real-time mental wellness assessments and user-personalized results.	
WebScraperApp <i>Python, Flask, HTML, CSS</i> Github	July 2025 – August 2025
- Engineered a dynamic web scraper to extract product details, automating data collection by 95% and reducing manual effort. - Implemented data cleaning and CSV export, improving data usability for analytics pipelines.	

TECHNICAL SKILLS

Languages: Python, C++, SQL (MySQL), HTML, CSS
Frameworks: Flask, React.js, FastAPI, WordPress
Libraries: Scikit-learn, NumPy
Developer Tools: VS Code, Git, GitHub, Canva, MS Office
Core Skills: OOP, Data Structures & Algorithms (DSA), DBMS, API Integration, Backend Development Basics, Problem Solving, Communication, Teamwork
AI/ML Capabilities: Data Preprocessing, Model Training & Evaluation

ACHIEVEMENTS

- Research Paper Published**, ICIRD 2025 (AI & Generative Models) | [Certificate](#)
- Research Paper Published**, ICASS 2026 (AI-Driven Employment Trend Forecasting) | [Certificate](#)
- Winner**, Spark3 Hackathon 2024 (State Level Hackathon) by HackIndia (among 200+ teams) | [Link](#)
- Winner**, InnoSkill 2026 Winner, Code Debugging Competition, Manav Rachna University Tech Fest 2026 | [Link](#)
- Winner**, YUDH 1.3 by Coding Club, Manav Rachna University | [Link](#)
